A POV by Infosys

Rise with AIR

HYPER-DRIVE SUCCESS WITH ENTERPRISE ARCHITECTURE

RALPH LAUREN | Infosys®

The rules of fashion
are being rewritten
And few will rise above in an age of volatility

The luxury landscape is under siege

Only the agile will thrive in today's fashion landscape

Market Concentration Rising

Power consolidating among dominant players; consumer confidence remains top concern.

Consumer Power Rising

Digital natives demand personalization and authenticity; loyalty is eroding.

Supply Chain Volatility

Geopolitical, economic, and climate pressures disrupting operations.

New Entrants Accelerating

Agile, digital-first brands gaining share through innovation and speed.

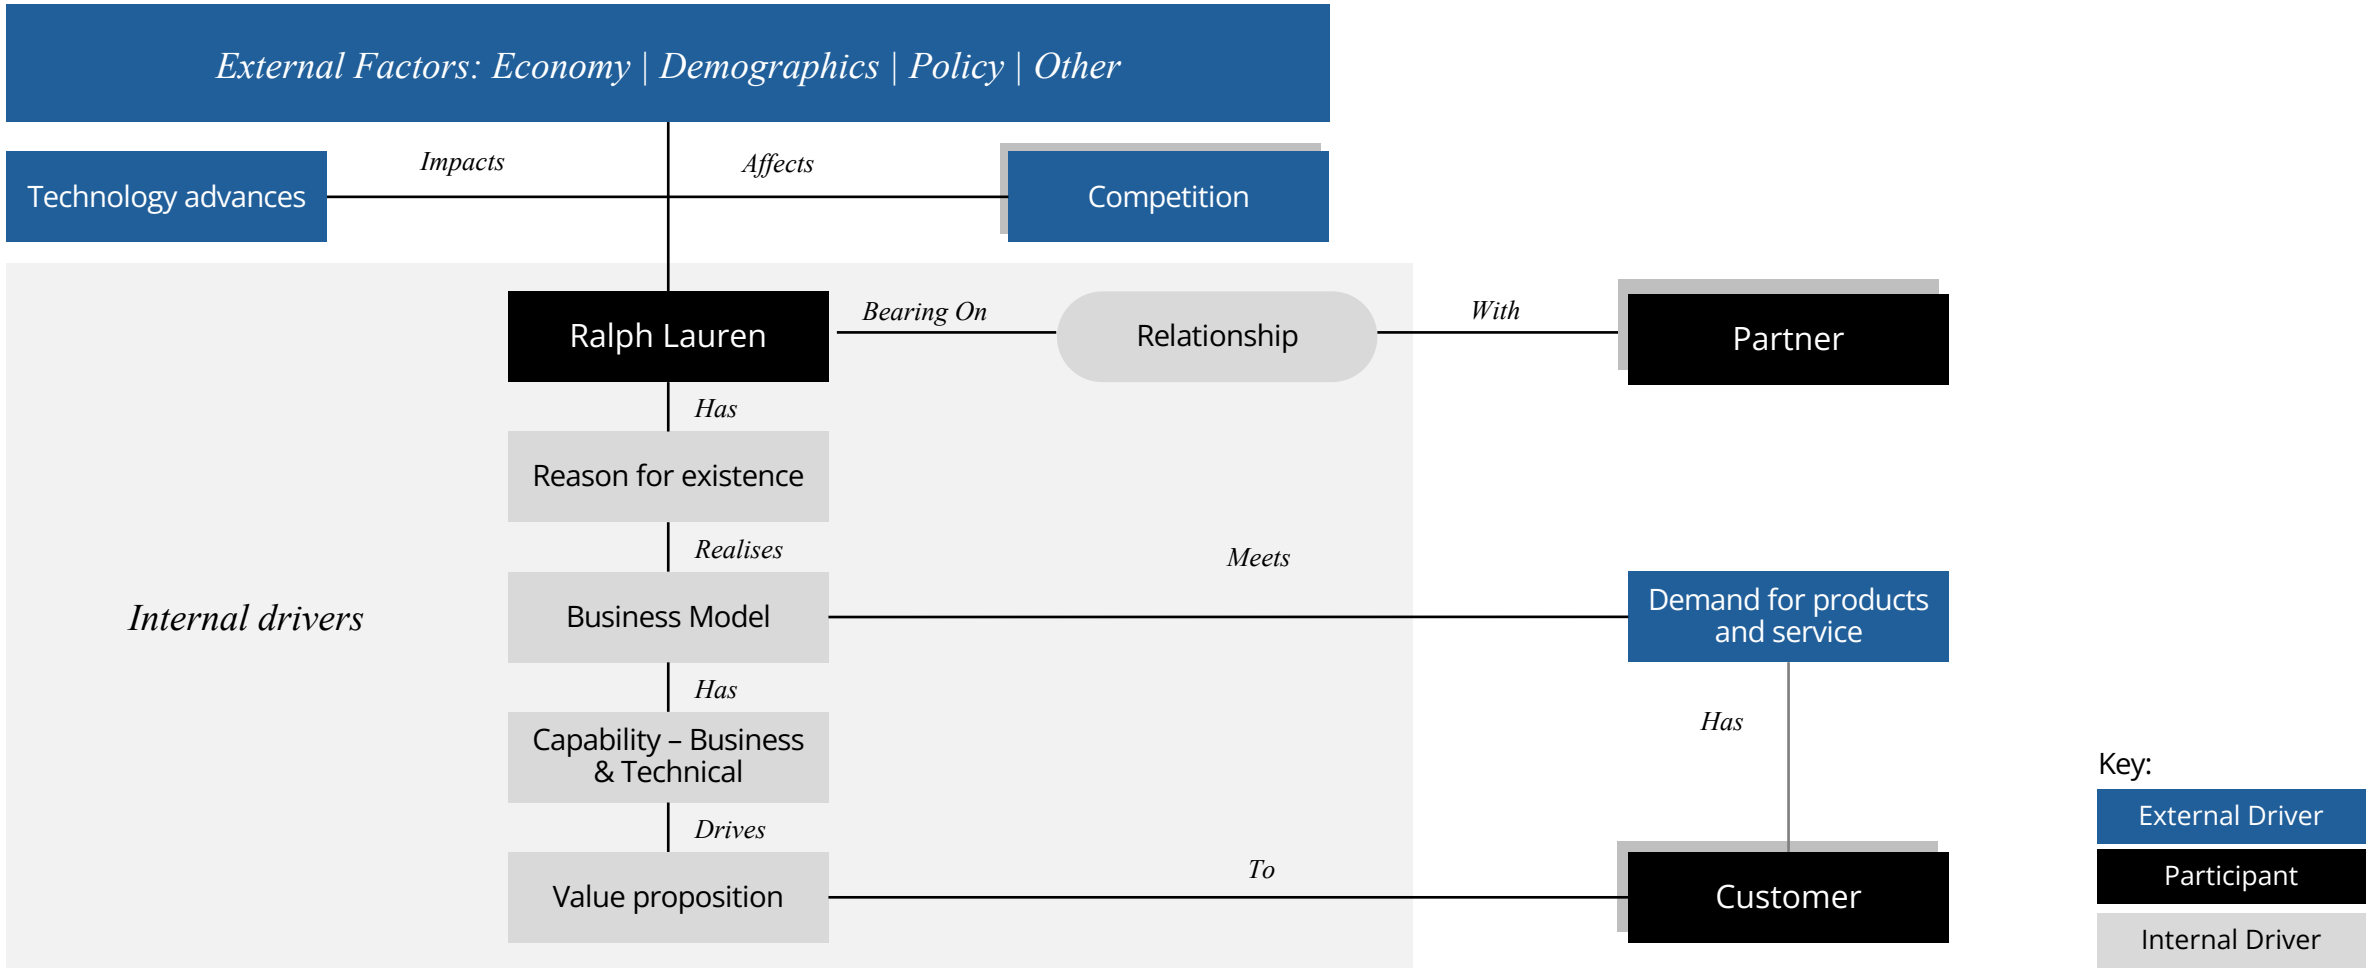

Substitutes Expanding

Rental, resale, and sustainable models fragmenting the luxury market.

The Reality Check: *McKinsey reports only 20% of fashion executives expect improvements in consumer sentiment in 2025, while 39% see conditions worsening.*

Success now depends on sensing change

Before it happens, and responding with precision and creativity

To rise from “Drive” to “Hyper-Drive,”

Ralph Lauren must first evolve into an AIR Enterprise.

Infusing **A I R** through **Enterprise Architecture** (EA) is the key to aligning strategy, technology, and operations

What it takes to become an AIR Enterprise

Ten critical capabilities that transform strategy into business advantage

(A) Adaptive Speed

01 Unified Digital Commerce
Seamless omnichannel integration with real-time personalization and inventory visibility.

02 Rapid Innovation
Accelerate AR/VR, Web3, and emerging tech adoption; cut time-to-market by 50%.

03 Future-Ready Workforce
Build AI-literate, data-driven teams empowered for fast decisions.

(I) Intelligent Insights

04 AI Hyper-Personalization
One-to-one customer experiences that predict customer needs and boost CLV by 20–30%.

05 Smart Forecasting
ML models cut overstock & stockout risk by 30–40%, optimizing working capital and full-price sell-through.

06 Real-Time Data Ecosystem
Unified analytics for faster, smarter enterprise decisions.

(R)Resilient Reliability

07 Agile Supply Chain
Flexible, diversified network with rapid scenario-based response.

08 Circular Sustainability
Regenerative, circular models driving growth and “Timeless by Design” goals.

09 Intelligent Automation
AI-driven efficiency cutting costs 15–20% while elevating service.

10 Financial Agility
Data-led scenario modeling for confident, capital-efficient decisions.

Enterprise Architecture (EA) designs the enterprise backbone that enables these AIR capabilities

Drive > Hyper-drive > A I R

Together we can

Drive

Strategic Drivers

Elevate and Energize your Lifestyle Brand

Drive the Core and Expand for More

Win in Key Cities with your Consumer Ecosystem

Enablers

Engaged & Empowered Teams

Industry-Leading Operations

Superior Technology

Resilient Partners

Powerful Balance Sheet

Enterprise Architecture

Powered by AI

Hyper-Drive

Strategic Drivers

Enhance Brand Desirability through Data-Driven Personalization

Accelerate Core Growth through Digital Innovation

Scale Omni-Channel Intelligence across Markets

Enablers

Future-Ready Workforce

Intelligent Operations

Next-Gen Architecture

Agile Ecosystem

Value-Driven Model

A I R ENTERPRISE

“
The excitement of being in this business is not following, it is about leading.
- Ralph Lauren
RALPH LAUREN | Infosys

THE STRATEGY

Leading with the SEAL framework

An enterprise that anticipates, adapts, and evolves ahead of disruption, uniting Ralph Lauren's timeless brand with Infosys' digital prowess.

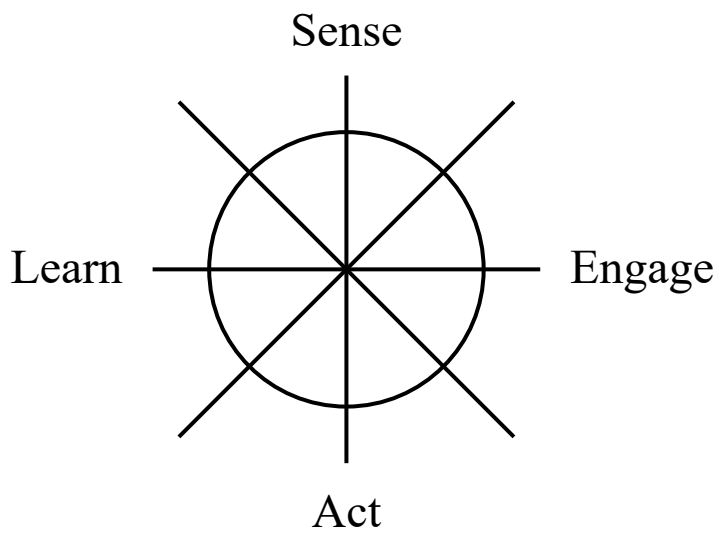

The framework has four core capabilities for advantage

Sense
Detect market shifts and opportunities in real time

Engage
Deliver personalized, meaningful experiences at scale

Act
Move with speed and precision to outpace change

Learn
Continuously refine strategies through data and feedback

Fusing Human Insight with Digital Intelligence

RALPH LAUREN | Infosys

Our growth strategy is strong

Execution speed will define market leadership

Strategic pillars:

Elevate the Lifestyle Brand

Enhance brand desirability and customer value through premium positioning

Financial Ambition

Deliver mid-single-digit growth and +100–150 bps margin expansion by FY2028.

Win in Key Cities

Scale a digital-first, omni-channel ecosystem across 30 global cities.

Drive the Core & Expand

Grow core lines while expanding into new categories and markets.

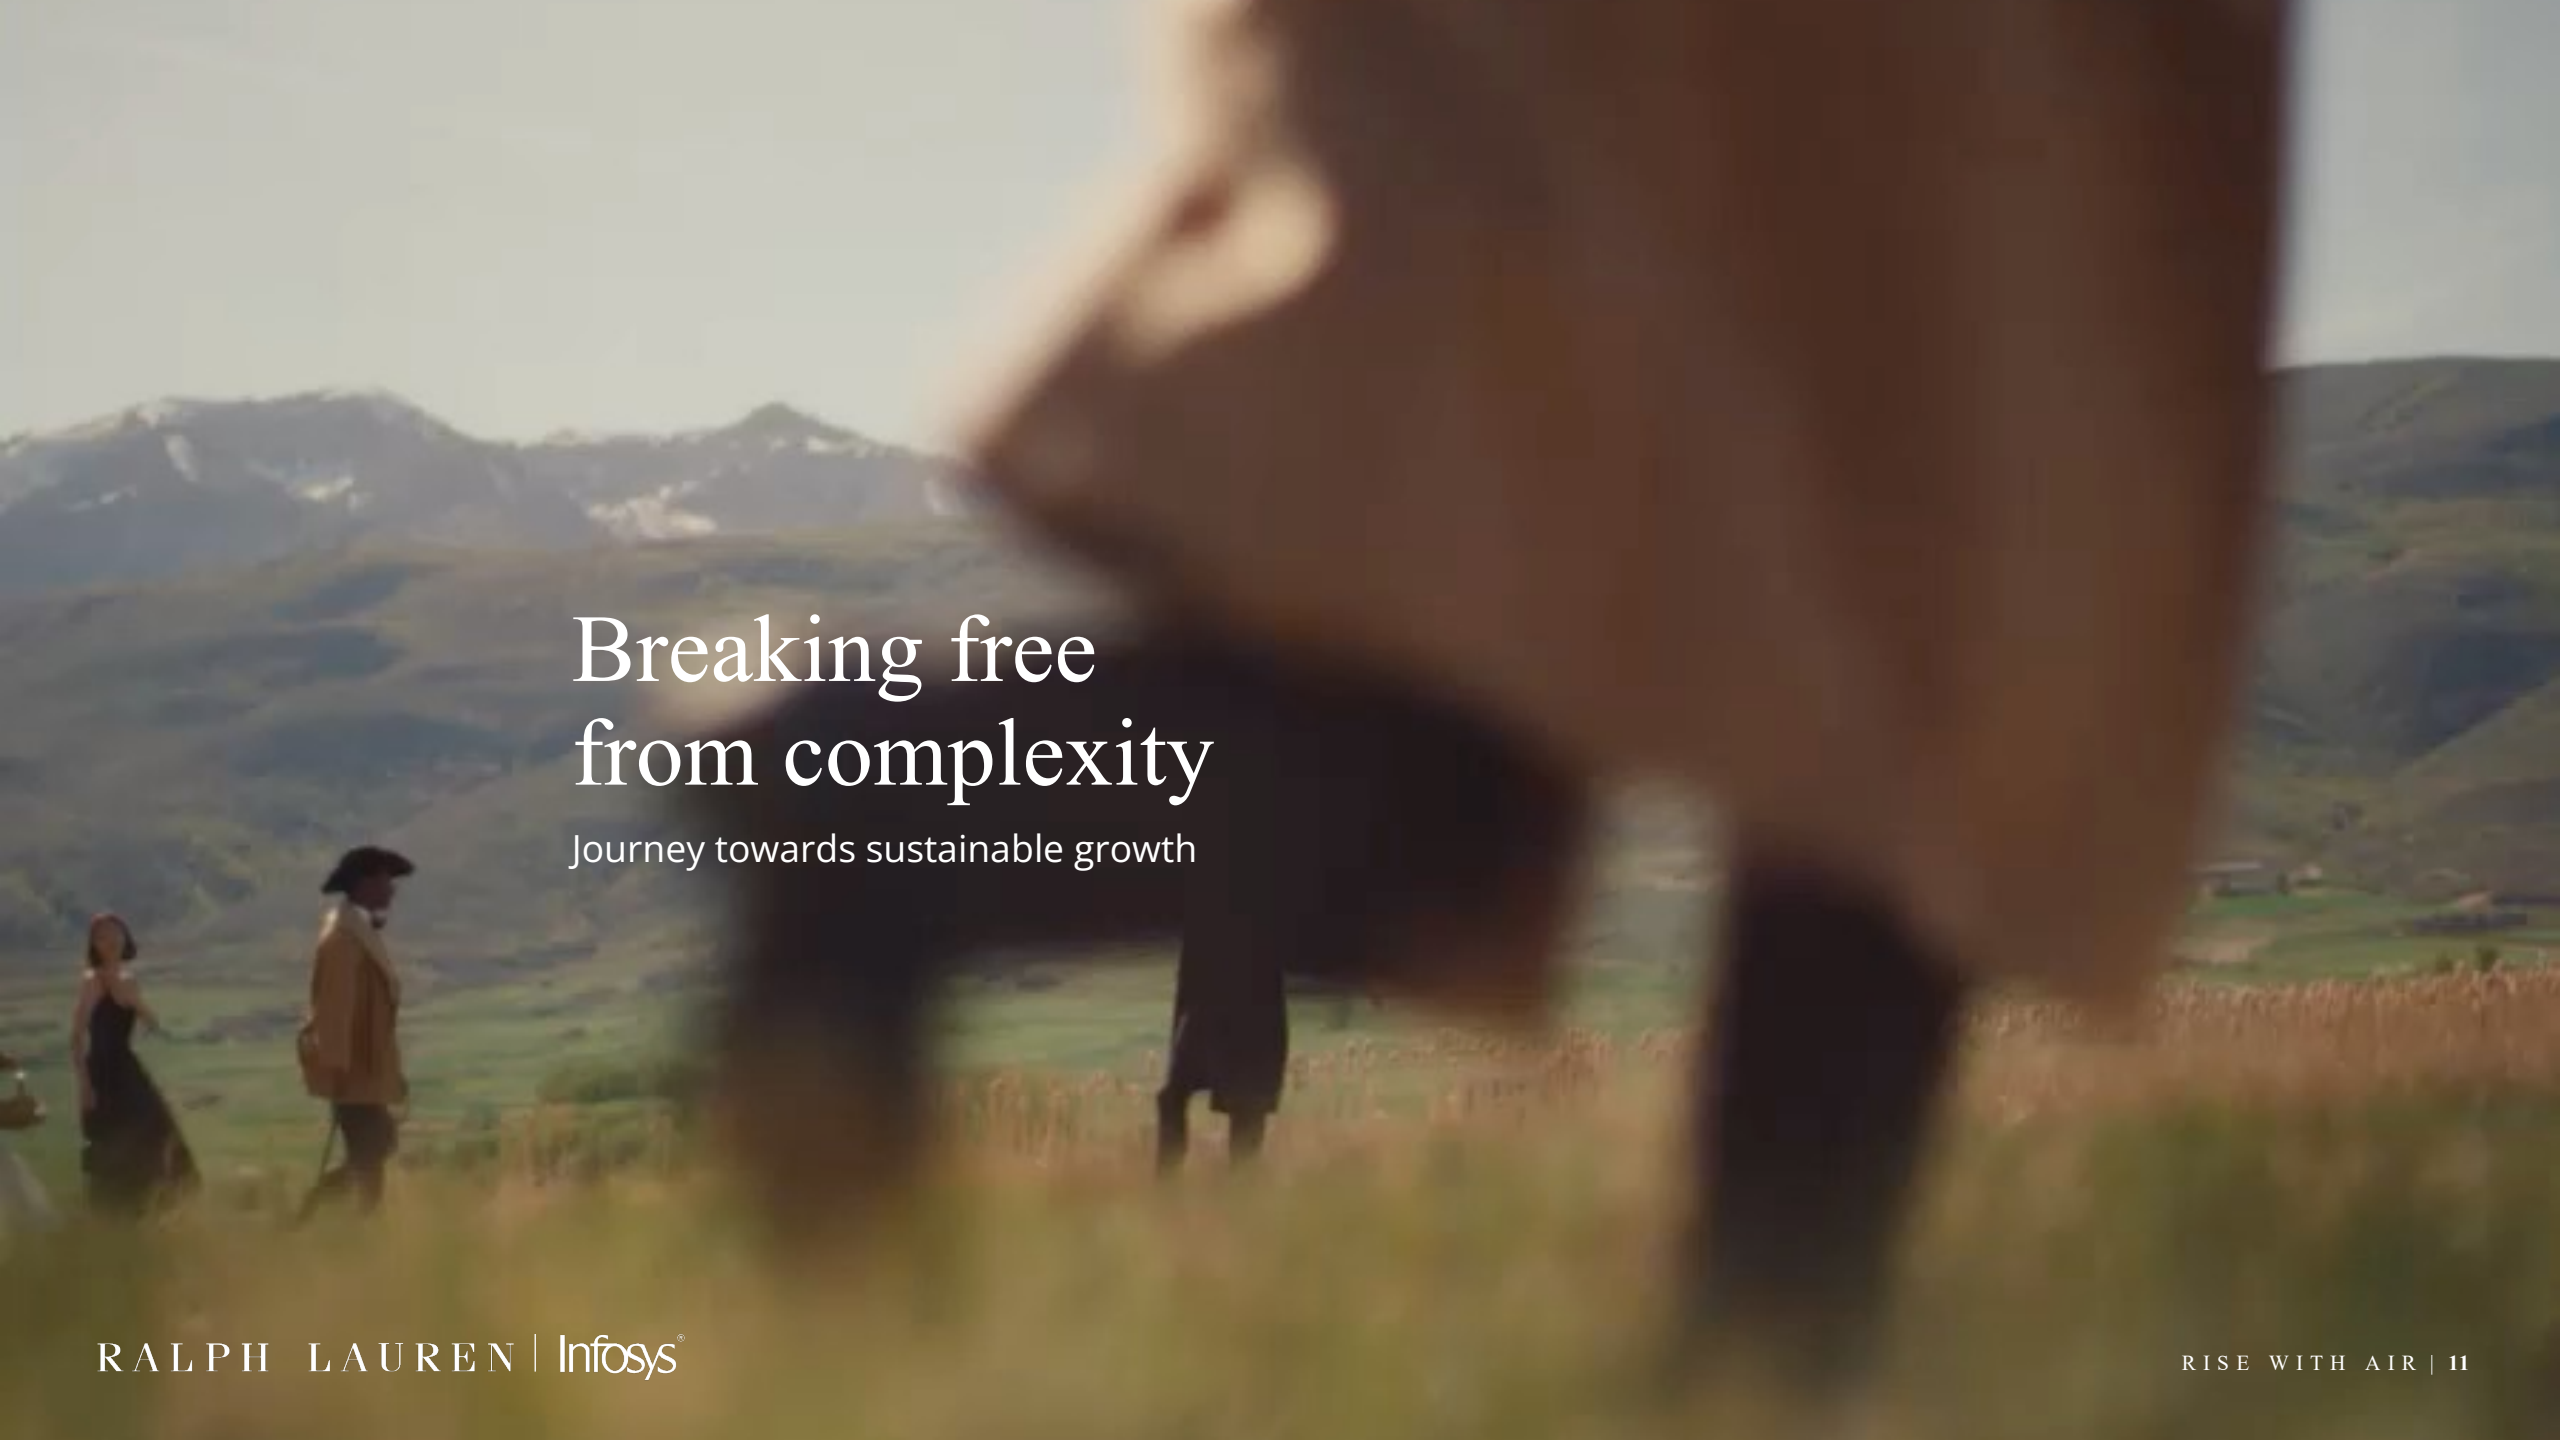

Leverage Technology

Accelerate AI-driven transformation to build an intelligent enterprise.

Transform Through Change

Lead in technology, data, AI, sustainability, and culture.

Breaking free from complexity

Journey towards sustainable growth

Today's complexity can block tomorrow's potential

Agility & Growth Constraints

500+ apps, 7 platforms, and 1,200+ integrations slow change and limit scalability.

Efficiency & Productivity Gaps

Redundant tools and high maintenance consume 40% of IT budget and constrain talent.

Data & Insight Limitations

Fragmented data and silos prevent 360° visibility and collaboration.

Risk & Resilience Concerns

Complex changes and fragmented platforms increase downtime, security, and compliance risks.

The Bottom line: *This complexity directly undermines our ability to execute "Next Great Chapter: Drive" and achieve our FY2028 targets. Every day of inaction costs us competitive position and margin opportunity.*

RALPH LAUREN | Infosys

A CLEAR PATH

Enterprise Architecture as the GPS system

Navigating the path to AIR

EA Is Not IT
Translating Ambition to Action

Complexity Reduction & Agility
From Bottleneck to Breakthrough

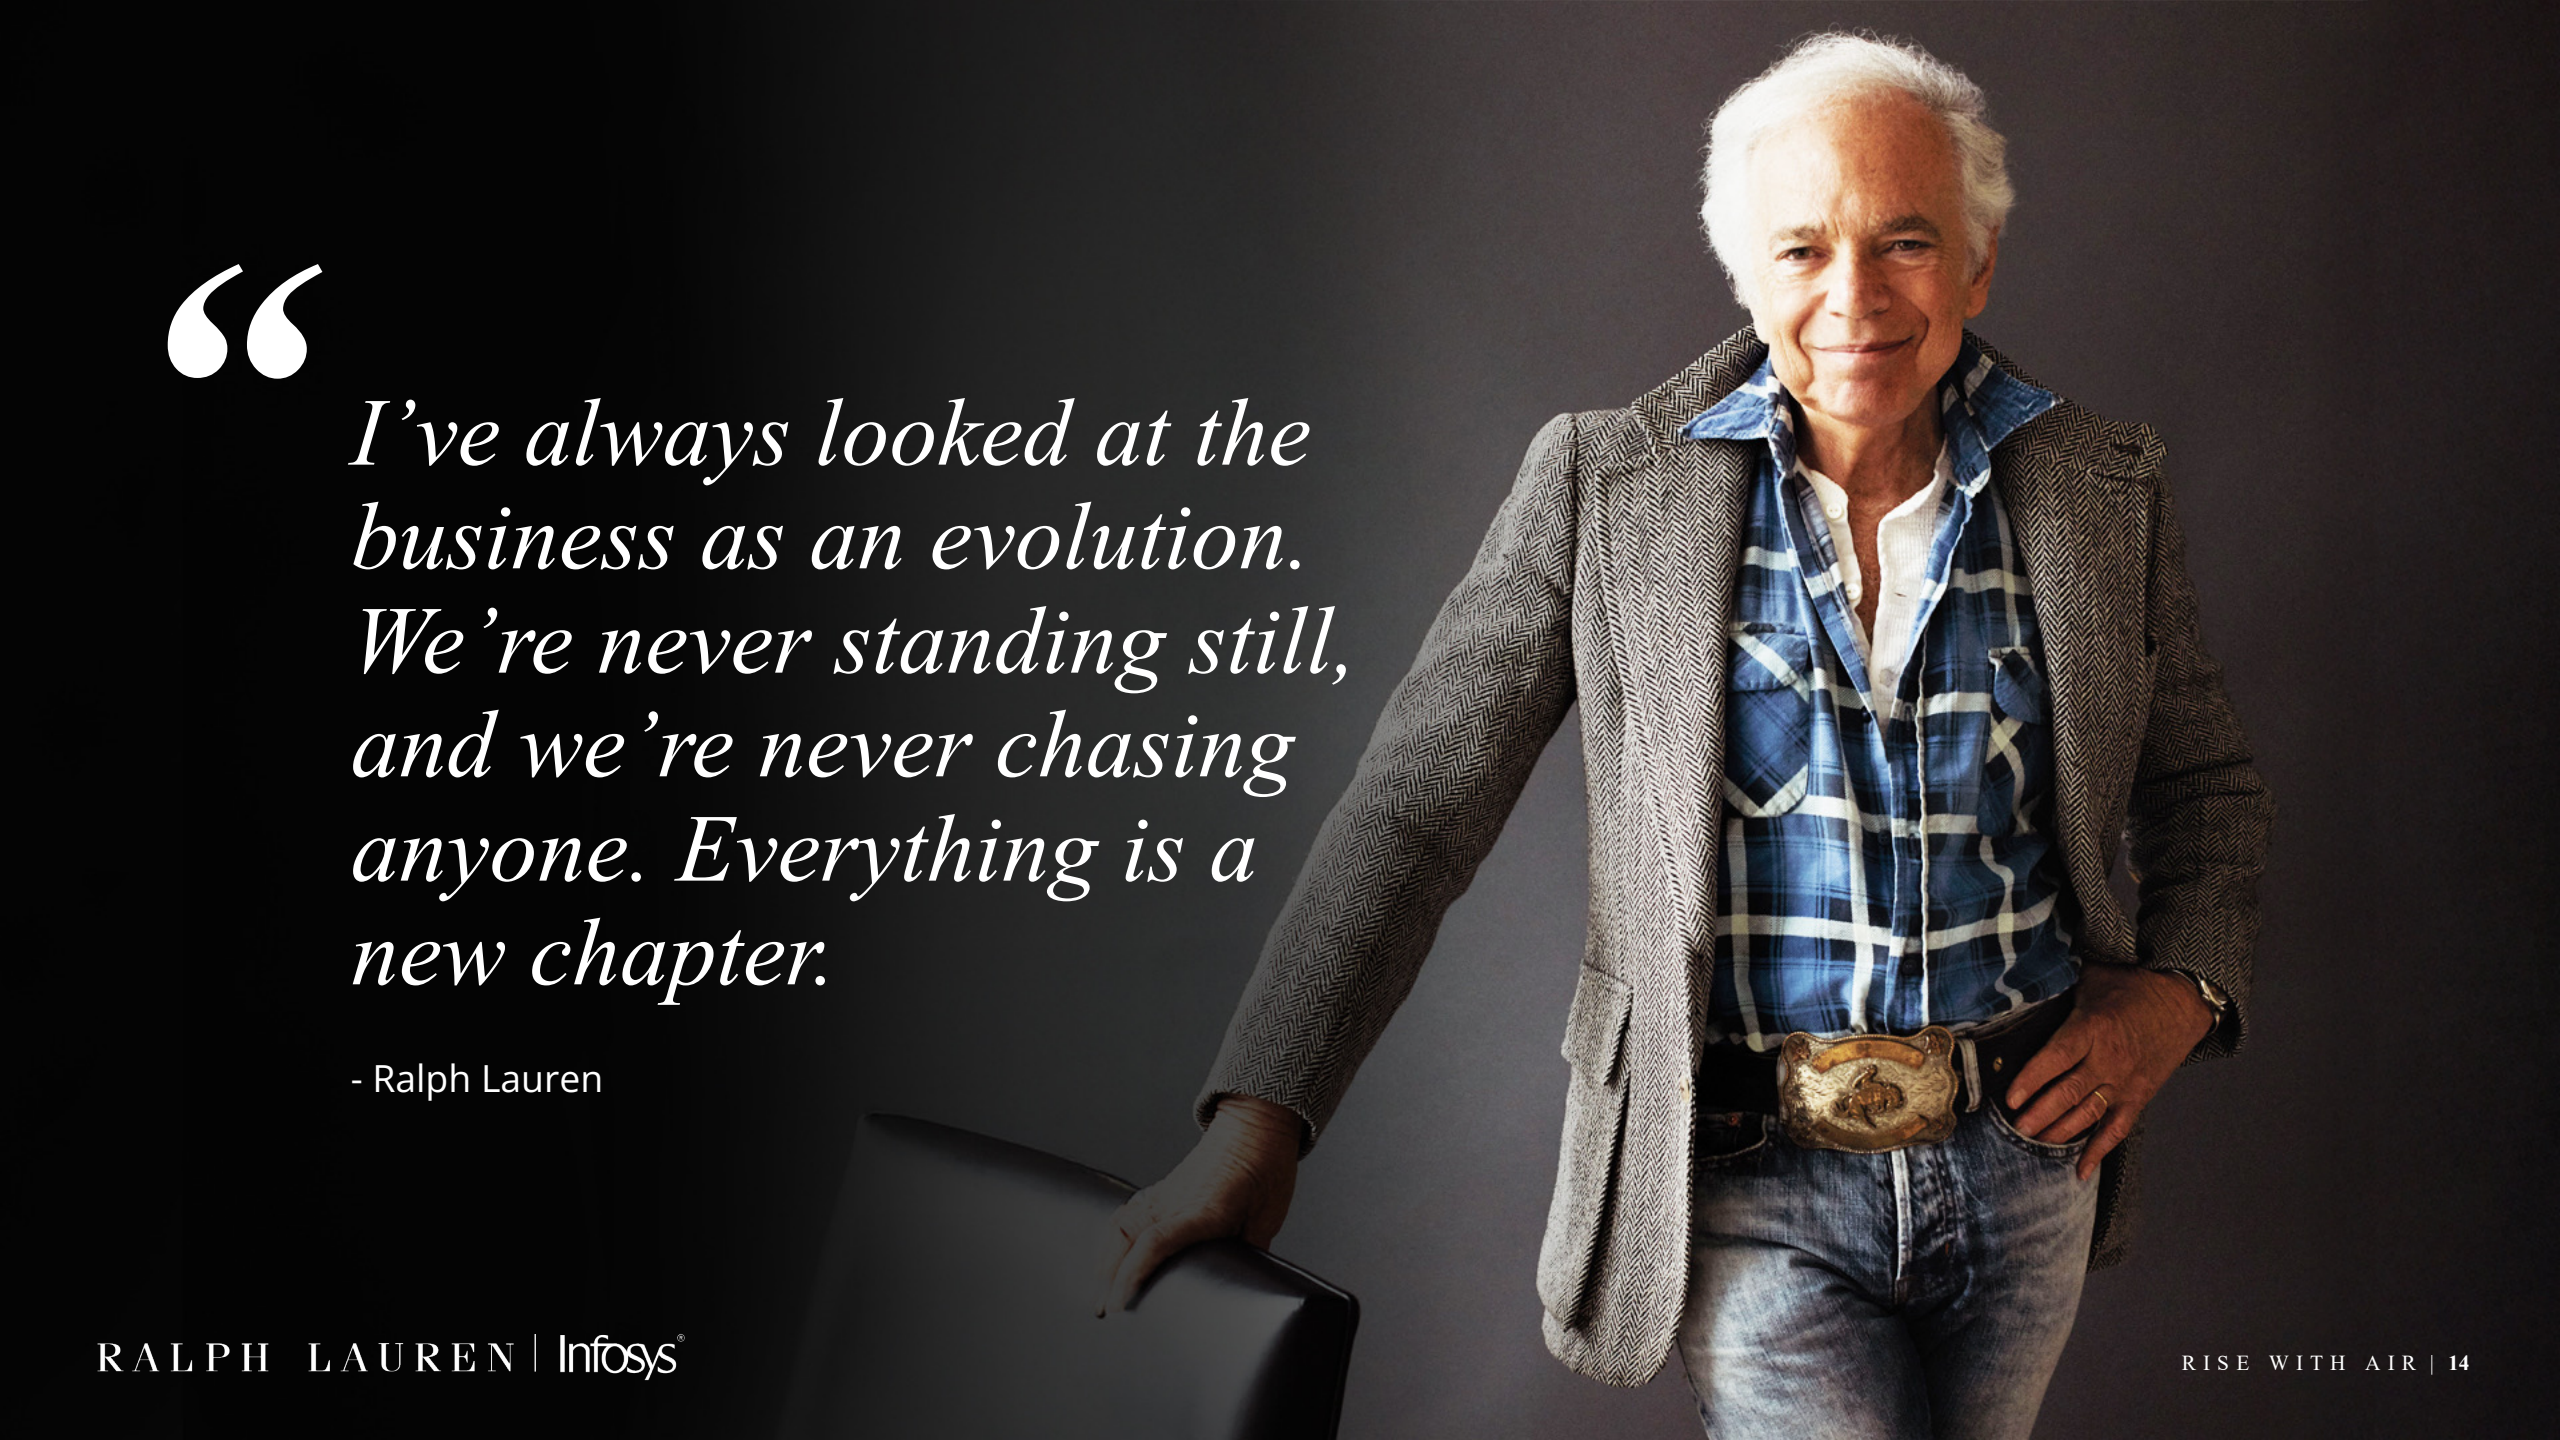

Enhanced Intelligence Capabilities
Building the Digital Brain

Operational Optimization
From Cost Center to Value Engine

Risk Mitigation & Resilience
Protecting Brand Equity

RALPH LAUREN | Infosys®

“
I’ve always looked at the business as an evolution. We’re never standing still, and we’re never chasing anyone. Everything is a new chapter.
- Ralph Lauren

RISE WITH AIR | 14

There is no A I R without AI

Embedding Intelligence into business: Five Strategic Pillars for AI-Driven Transformation

AI-Driven IT Strategy

AI as Strategic Compass: Leverage AI across design, supply chain, and engagement with ROI and governance.

Strengthen Foundation

No Intelligence Without Infrastructure: Modernize systems, cut apps to 300–350, and build trusted, scalable cloud data.

Scale AI and Agents

From Pilots to Production: Apply predictive analytics, automate 40–50% of workflows, and deliver hyper-personalization.

Embed Responsibility by Design

Trust as Advantage: Ensure fair, transparent, explainable AI while protecting privacy and aligning ethics.

Transform Talent & Op Model –

People Enable Technology: Upskill teams, create AI Centers of Excellence, adopt agile models, and attract top talent.

A I R

*The Promise: Transform IT from order-taker to strategic partner, shifting from **"keeping the lights on"** to **"lighting the way forward.***

An AI-First Enterprise Architecture

We have a comprehensive AI strategy embedded in our architecture

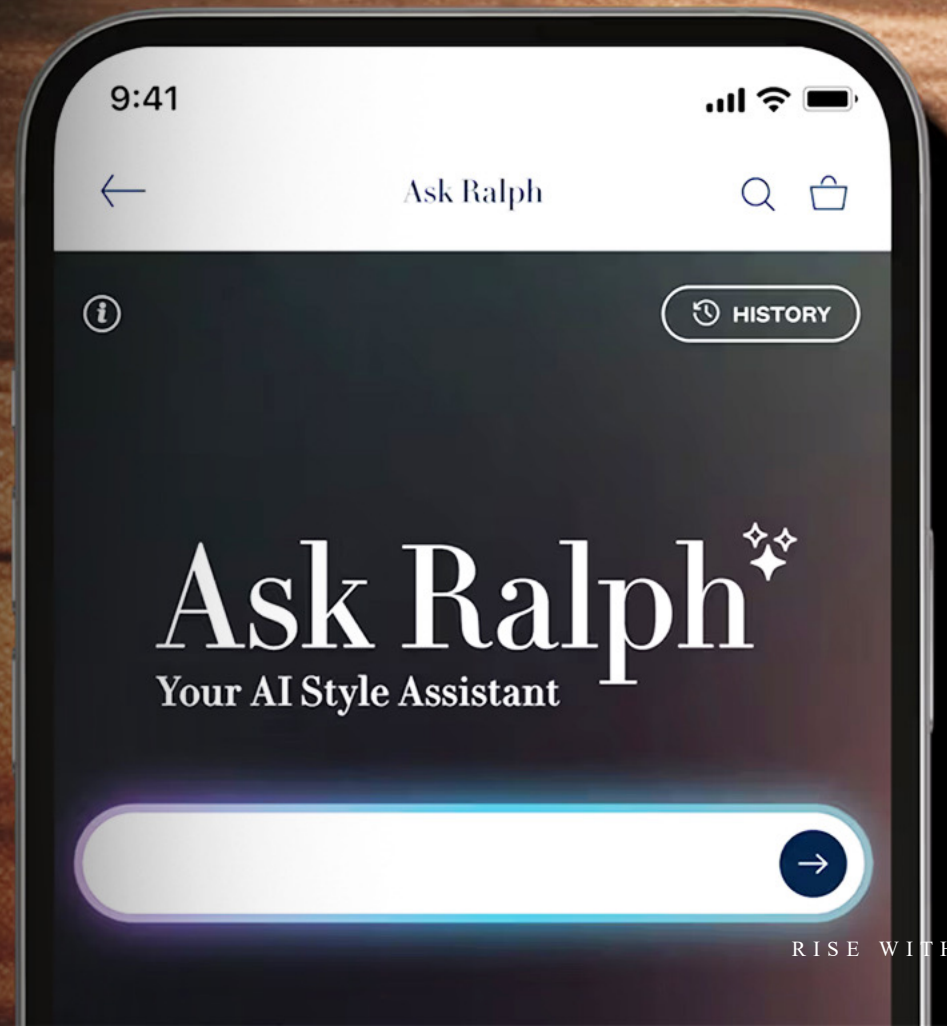

Poly-AI Strategy
Integrate ML, NLP, vision, and generative AI; balance proven tech with emerging innovation for maximum value.

Evolutionary Architecture
Flexible, standards-based systems enabling continuous AI integration and innovation.

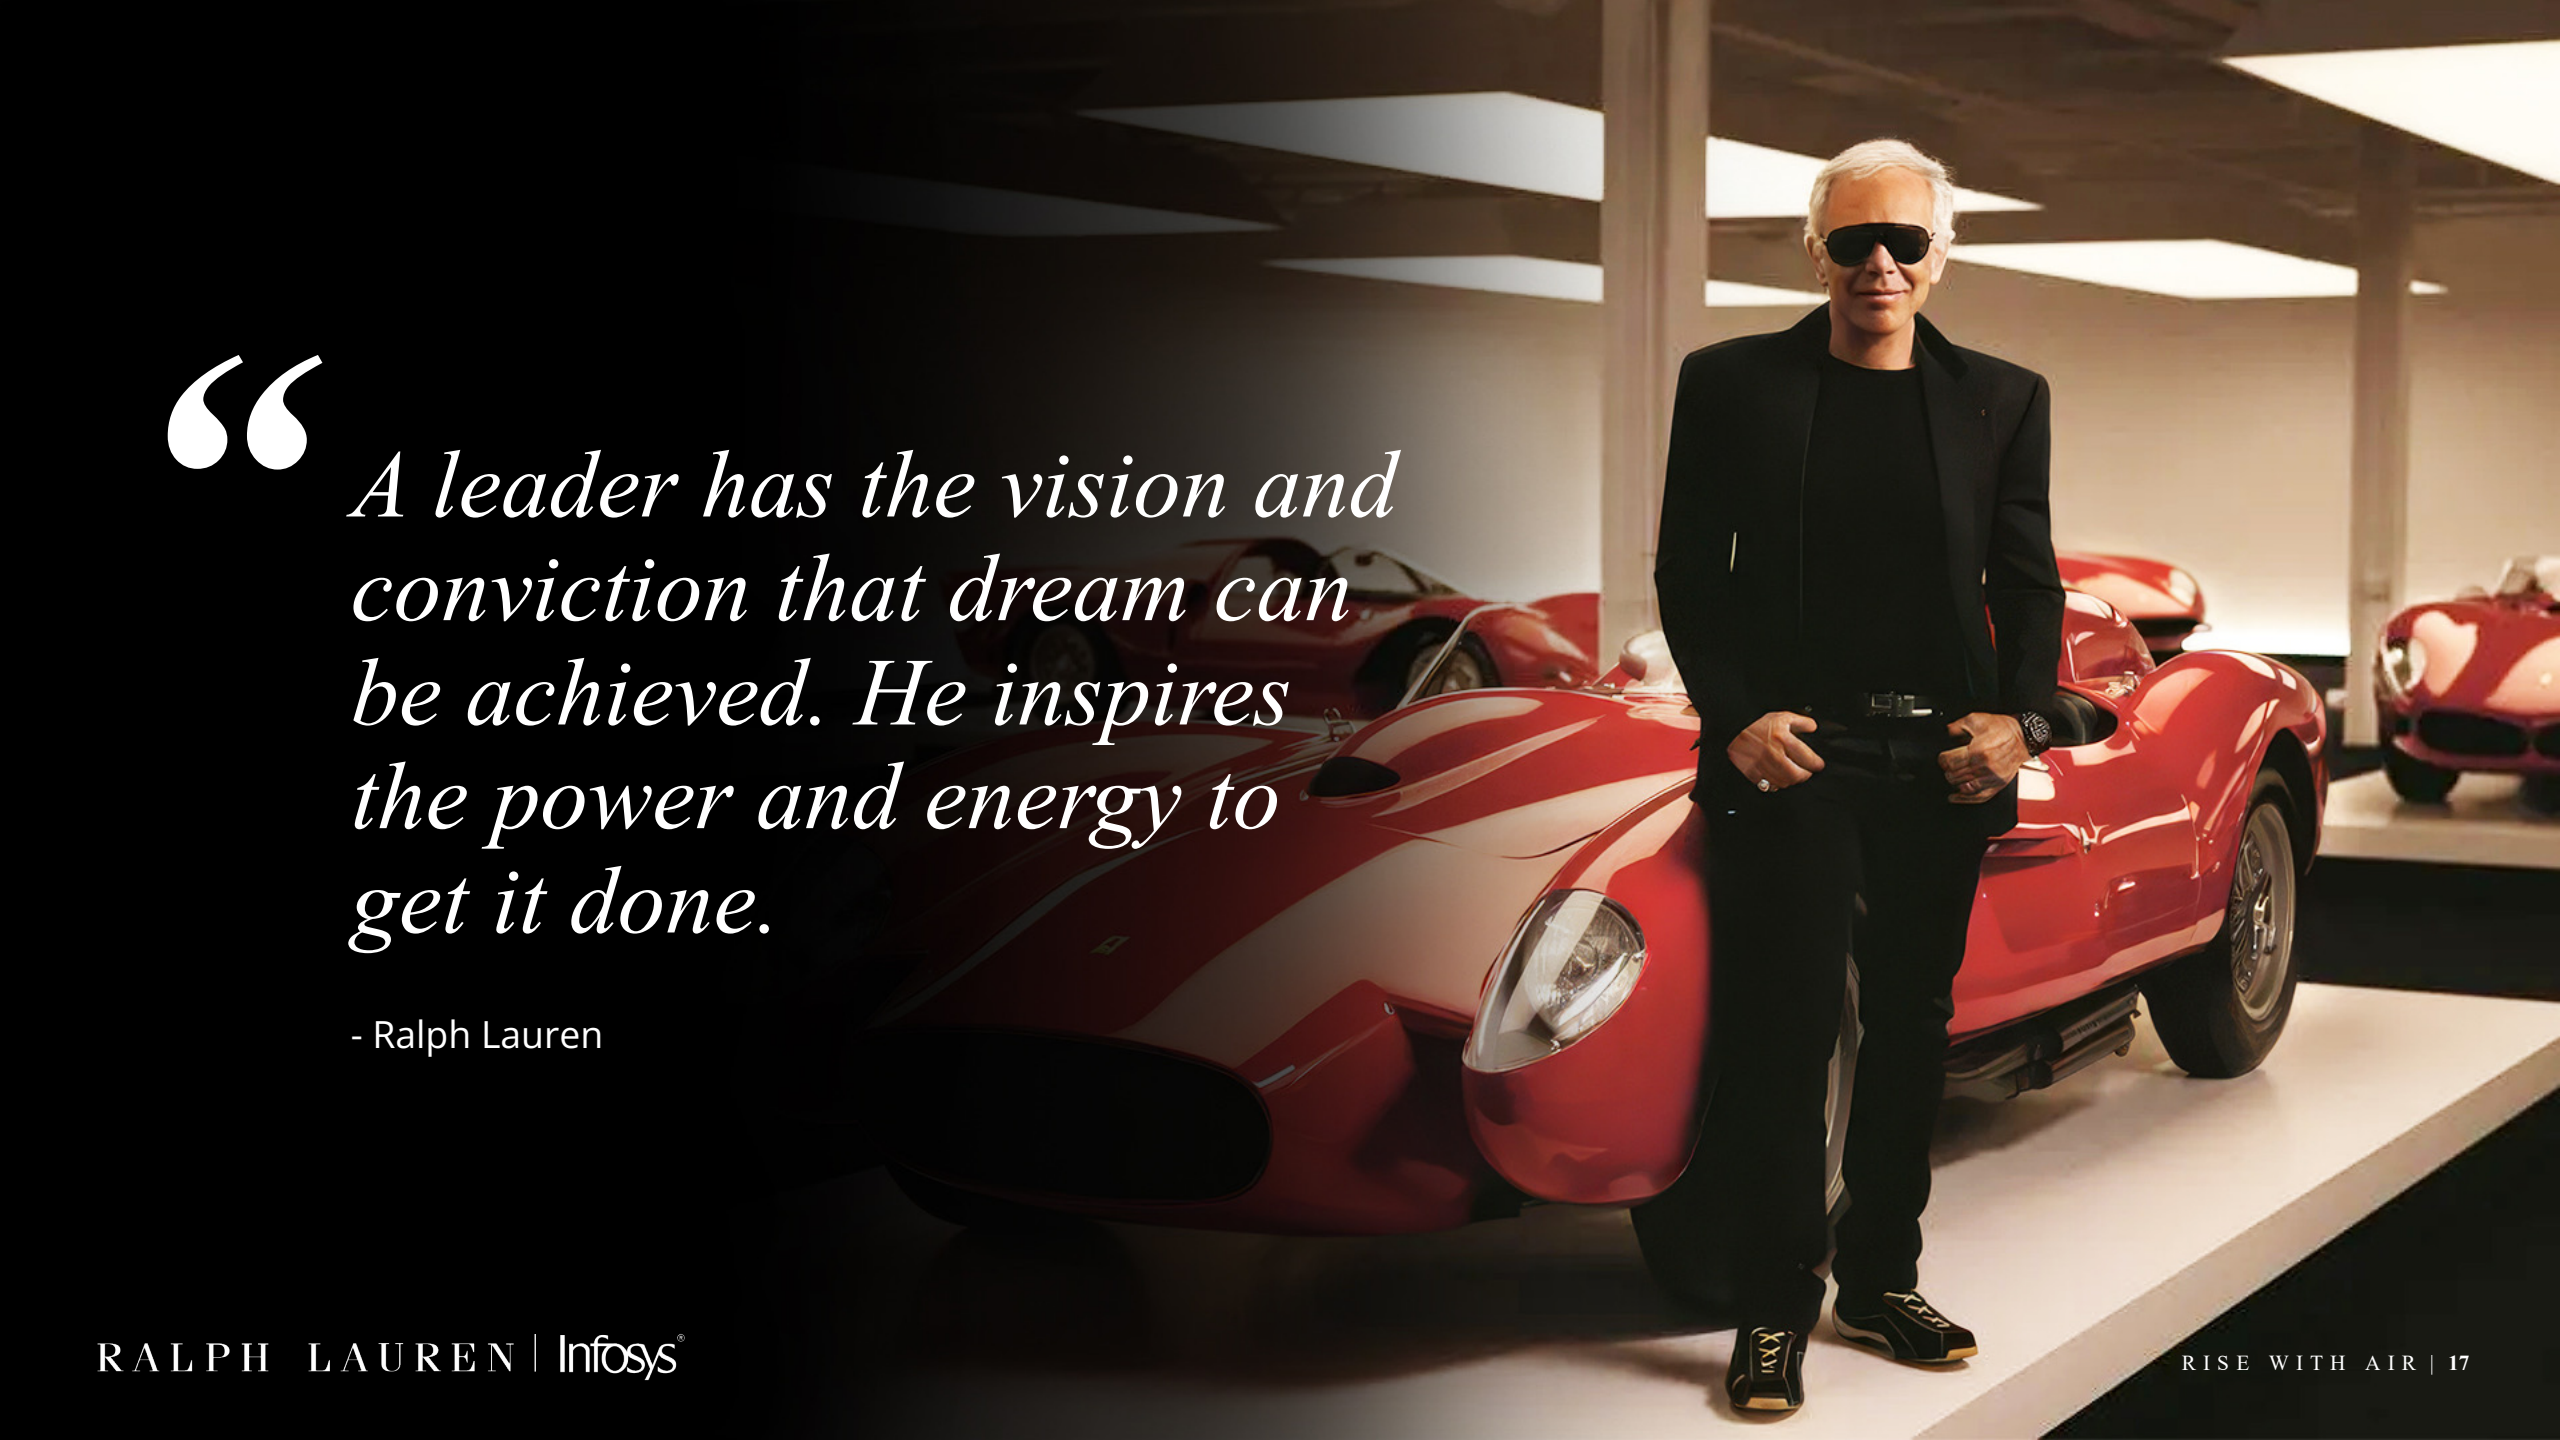

Specifications-Driven Development
Standardized AI communication, orchestration, and observability across the enterprise.

Culture of Experimentation
90-day AI sprints and low/no-code tools accelerating innovation at scale.

Strategic AI Runways
Scaled generative, agentic, and knowledge AI powering creativity and automation.

RALPH LAUREN | Infosys

A leader has the vision and conviction that dream can be achieved. He inspires the power and energy to get it done.

- Ralph Lauren

Ambition to Achievement

Make the commitment

Enterprise Architecture

Driving tangible business value

Accelerates Strategic Agility

Speed as Weapon: Enables 50% faster time-to-market through composable architecture and continuous 2–4 week delivery cycles.

Enhances Competitive Leadership

Differentiation Through Intelligence: Drives 20–30% higher customer lifetime value with AI-powered personalization and seamless global experiences.

Ensure Profitable Growth

Margin Expansion Through Efficiency: Cuts IT spend by $20–30M, improves margins by 100–150 bps, and reduces inventory costs by 15–20%.

Mitigates Risk, Builds Resilience

Protecting Brand Equity: Strengthens governance, security, and supply chain resilience while reducing downtime by 60%.

Fosters Innovation & Future-readiness

Perpetual Competitive Advantage: Enables continuous tech adoption, rapid experimentation, and attracts top digital talent.

Modern Enterprise Architecture is not an IT initiative, it is the very engine of Ralph Lauren's Adaptive, Intelligent, and Resilient (A I R) future.

In a world of rapid change, EA makes technology a strategic asset, driving agility, intelligence, and leadership—the question is not if we invest, but if we can afford not to.
