SEVIORA

Infosys COMPAZ

iCompaz Progression in the last 3 years

We have diversified our portfolio through key client acquisition and our we have become much more matured

Understanding of Your Requirements

Your Problem Statement

Seviora has many local and remote offices that all require technology support. **Day-to-day issues** continue to be a challenge, as well as managing and providing support to remote offices.

Seviora wishes to pursue opportunities for **addressing costs**, while simultaneously ensuring **ongoing operations** continue (impact-free), and new capabilities are enabled in their technology operations environment.

Seviora is looking to appoint a vendor partner to support their operating environment, with a focus on their group cloud platforms, helpdesk, and end user devices.

Your Challenges & Ask

There is a need to **ensure operations continue uninterrupted** while the new vendor partner comes onboard.

Evaluation Criteria are as follows:

- Service Delivery Operating Model and Quality
  - Scope of Work
  - Service Delivery and Governance Model
  - Organizational Structure
  - SLA Adherence
  - Security & Compliance
  - Solution & Project Support
  - Transition Plan & Team
- Technical Knowledge & Resource Expertise/Experience
- Digital & Technology Transformation Capabilities
- Financials/Cost

Our Understanding

In our discussions with you, we identified that:

- You are interested in getting **better service and support.**
- You are looking for a **better return on the cost** invested.
- You would like to uplift the image of technology support and operations.
- **Security and resiliency** are important to you.
- Knowledge Transfer (KT) must start on 1st Aug, 2025, to enable service commencement on 1st Nov.

Key Solution Tenets

To meet current and future requirements for Seviora

1. Risk-Free Transition

- Specialized Tools and Accelerators for De-Risking the Transition
- In-depth Experience in Transition Management

2. Delivery Excellence

- Zero Tolerance Mindset & Flawless Execution
- Predictable and “No surprises” Service Delivery
- Continuous Improvements and Scalable Operations

3. Service Methodology

- Meet Current and Future Needs
- Leverage Best Practices developed from partnership with clients

SEVIORA

iCompaz – Seviora Partnership

4. Balance of Practitioners & SMEs

- Subject Matter Experts and Thought Leaders
- Practitioners with Financial Services Industry Experience

5. Security & Compliance

- OSPAR, SOC2 and ISO 27001 Certified
- Experience with Regulatory Frameworks (MAS Technology Risk Management & Notices)
- In-depth Knowledge of Frameworks (Cyber Trust Mark, Cloud Trust Framework etc.)

6. Cost Optimization

- Right Balance of Costs and Efficiency
- Cost Optimization and Scalability via Innovation and Automation

Transition Accelerators

We will Leverage Proven Transition Assets to Accelerate Transition

TOOLS

Infosys Transition Workbench

Transition status dashboard

Program Management Kit

Proven checklists, templates

Problem Analytics

Analyzes database of past tickets and resolution steps

Infosys Knowledge Portal

Building on pre-configured knowledge

Milestone MPP

How Seviora Benefits?

- Optimized transition timeline through knowledge acquisition
- Build Seviora knowledge academy
- Collaboration on risk mitigation and issue resolution
- Knowledge retention and enrichment
- “Finger on the Pulse” visibility into transition progress

Noiseless Ops through EASE framework

ELIMINATE

- Automation, Reusability
- Leverage globally proven practices
- Strong capabilities across ITSM, Cloud, EUC, M365

AUTOMATE

- VLAN Creation, Port config,
- Add/Modify firewall rules
- DNS, IP Address Request
- Zero touch deployment
- Batch job failure
- Automate Maintenance job failures in Database
- Disk space issues
- Back up failure

SHIFT-LEFT TO L1

- Password Reset
- User Access issues
- Troubleshoot VPN issue

Target State

Benefits to Seviora

Efficient Operations

~15% **Reduction** in Ticket Volumes

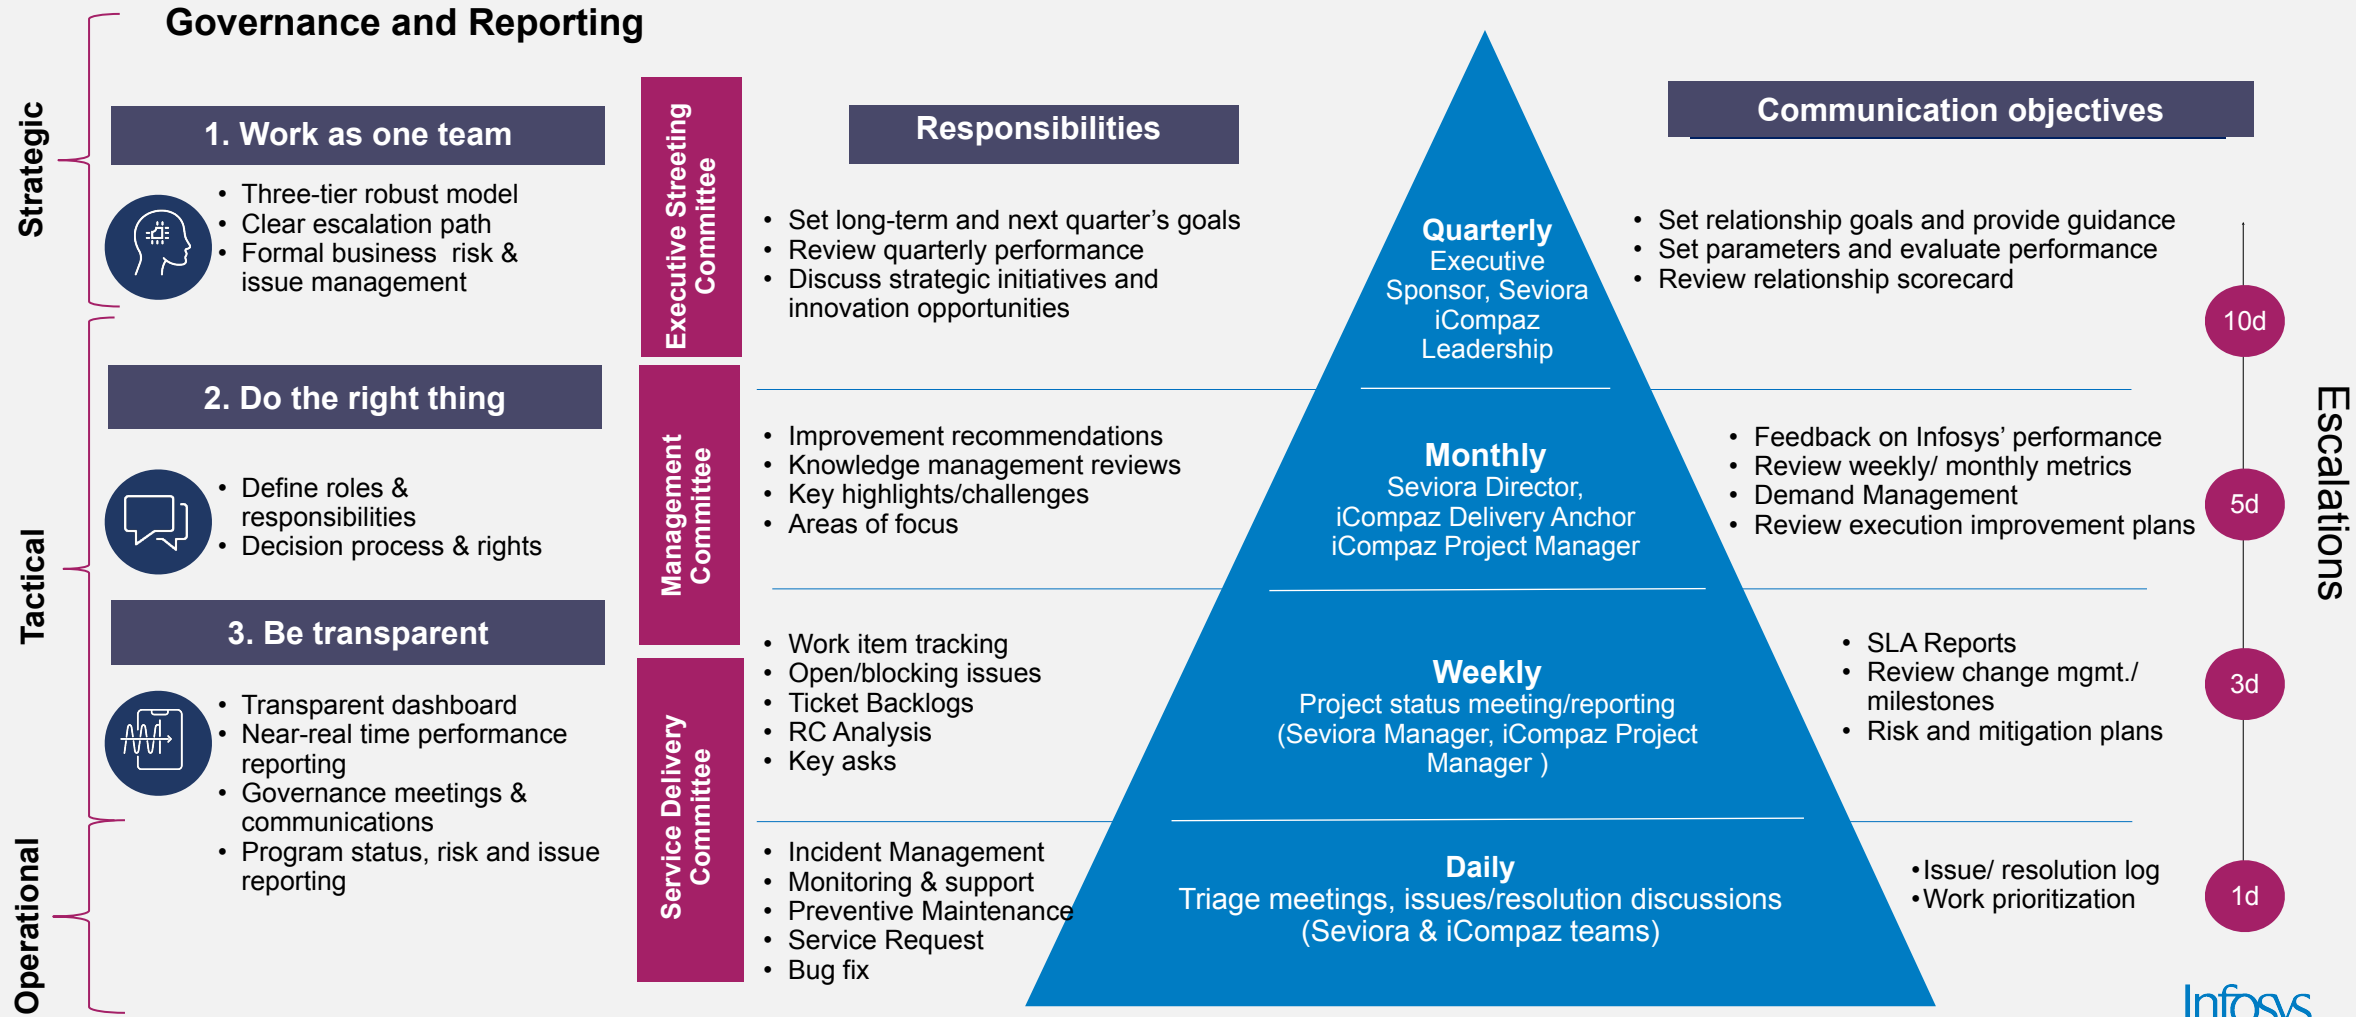

Backlog Clearance

Automation Use Cases

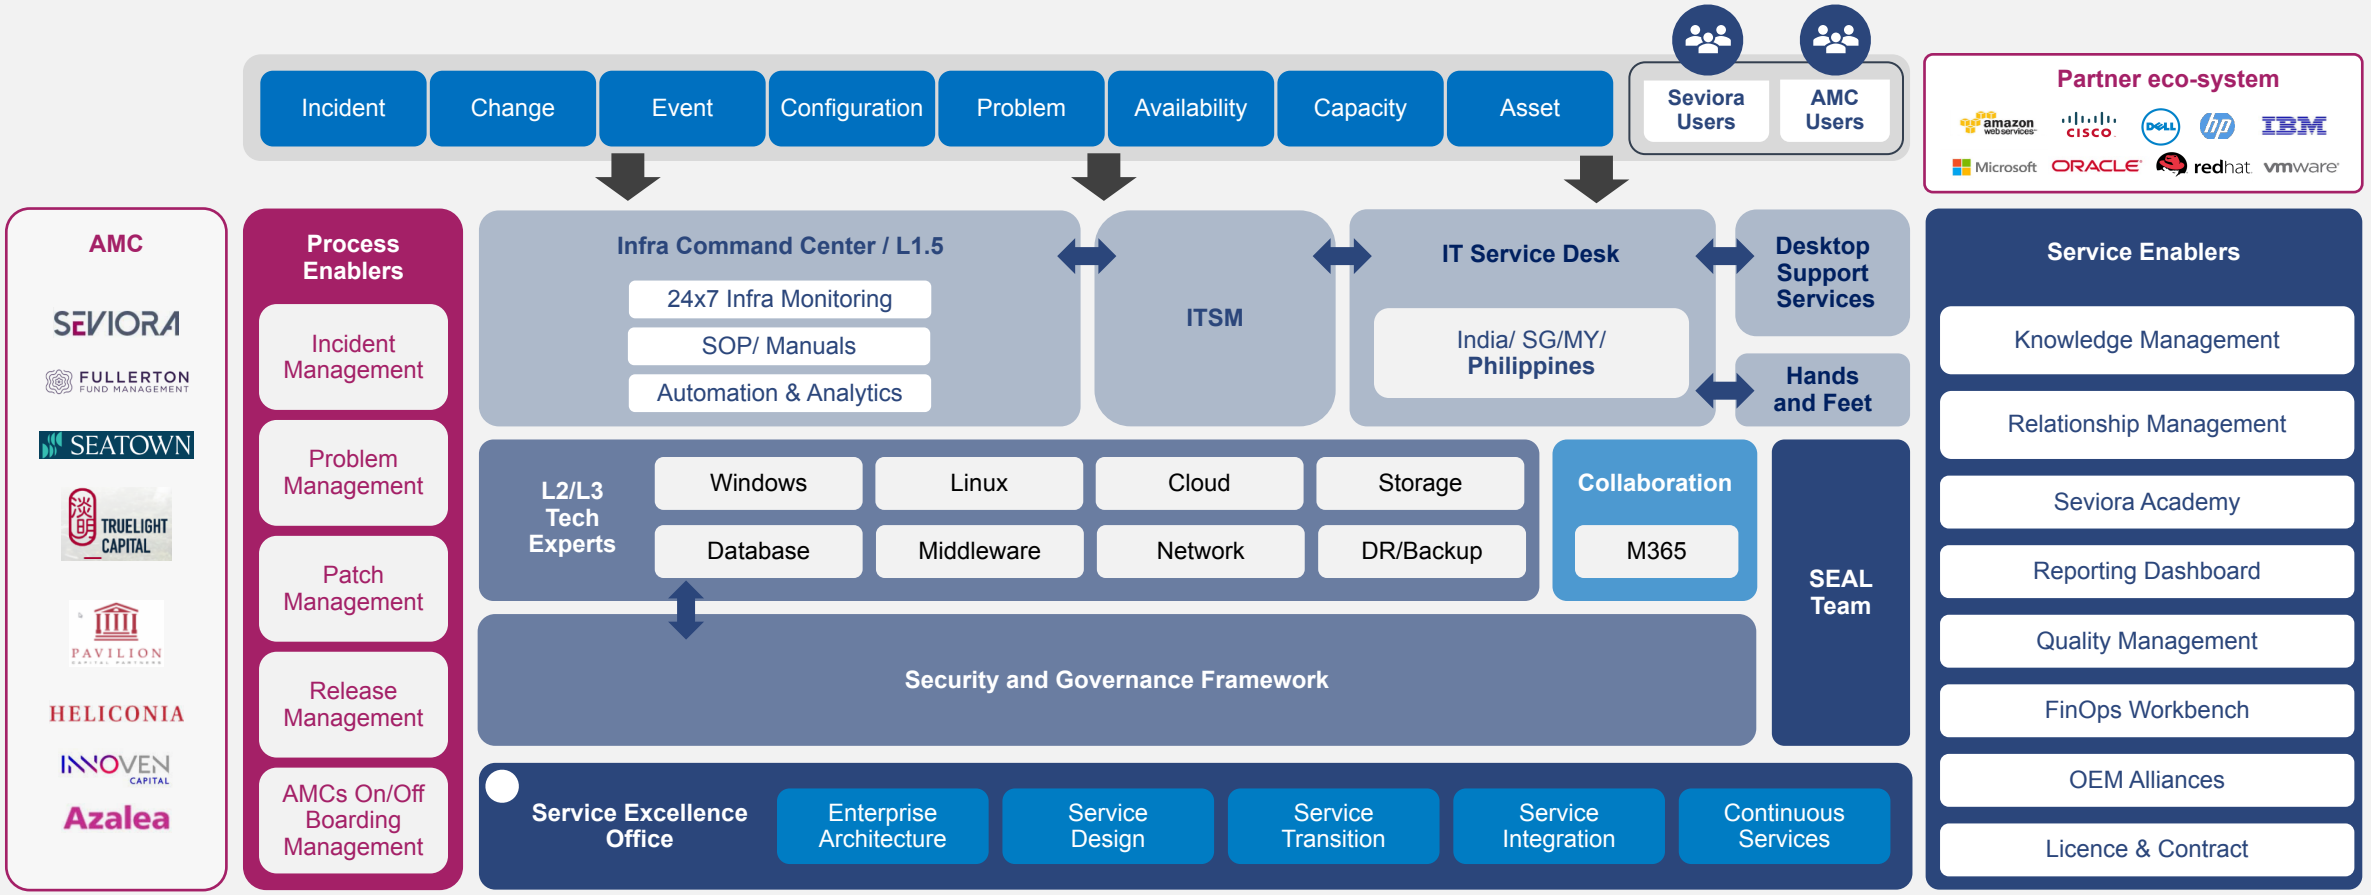

Use case	Definition	Benefits
Problem Management Analytics	Identifies the problem patterns from raw ticket data, to get insights on the problem trend and identify automation capabilities	**~20%** reduction in MTTR
Logic Monitor Integration	Logic Monitor integration with Jira to capture all the alerts/events to prioritize and fix	Operational efficiency
Batch Job Prediction	Effectively predicts the batch job completion ETA and help achieve SLA adherence	Prevent P1/P2 tickets
AWS Billing Forecast	Forecast the cost till next 3 months based on 6 months of historical data	Future predication to optimize cost utilization, **100%** optimization observed
VM optimization	Recommends to upgrade/downgrade the instance based on the usage	**15-20%** cost reduction

Governance Structure w/ iCompaz Leadership

This is our solid Governance structure, which includes a strong commitment from the iCompaz leadership

Integrated Target Operation Model

Key Competitive Advantages

Key Competitive Advantage

“AI for Infra”

Real Life use cases of AI for Infrastructure across the TechOps lifecycle

Keep Lights On

> 30-40% PI
> 50% Improved MTTR

Monitoring & Incident Management

- Alert Correlation
- Email BOT Classifier & Ticket Creation
- Intelligent Ticket Routing
- Ops Assist: Incident Summarization
- Blast Radius Detection
- Ops Assist: KB & Resolution Recommendation
- RCA, RCA report & Customized Notifications

Service Request Management

- Service/Server Restarts
- Job Resubmission/Cancellation
- Access/Account unlock/Password Resets
- User Sentiment Analysis

Lifecycle management

80% Improved Time to Market
< 5% Tech Debt

Patching & Vulnerability Remediation

- Patch Scheduling & Communication
- Pre and Post Validation
- Zero touch Patch Deployment
- On Demand Backup and Restoration

Tech Refresh & Upkeep

- Ops Assist: EOL/EOSL Recommendations
- OS/DB/Firmware Upgrades
- CMDB Updates/Upkeep
- Ops Assist : Runbook Upkeep
- Cert Renewal

Resiliency & Availability Management

100% SLAs, Availability
80% Improved MTTD

Preventive Maintenance

- Proactive Incident Prediction for EUC
- Anomaly Detection for Wireless Devices
- Batch Job Prediction for SLA Breaches

Capacity Management

- Capacity Forecast
- Autoscaling
- Resource Provisioning/Decommission
- Cleanup/Reclaim
- Change Impact Analysis

DevOps & Optimization

> 50% Effort Reduction
> ~30% Cost Savings

DevOps

- Copilot : Infrastructure as Code (IaC)
- Automation scripts with Ansible/Python
- Self Healing BOTs

Optimization

- Ops Assist : DB Query Optimization
- FinOps/Cost Optimization
- License Forecast and Optimization

Automation
AI Ops
Gen AI
Self Serve
Ready Solutions
